Anna Margareta is here referred to as "Skräddaren Anders Bollwis hust. [hustru]" – The wife of taylor Anders Bollwi.

Row 2: "mannen utgl. [utgammal]" – The man overaged

Row 3: "Svärmodern utgl." – The mother in law overaged

Rows 4 and 5: "D. Ellena, Anna, och Malena" – The names of the daughters and a note in the column for underaged children.

The underaged and overaged notation means that the farm does not have to pay tax for those persons. Usually you became overaged at 63, but it could happen earlier if you were very weak of age”.

1786

Anders is still alive here, the record was actually made the autumn before the year, in this case Dec 2 1789.

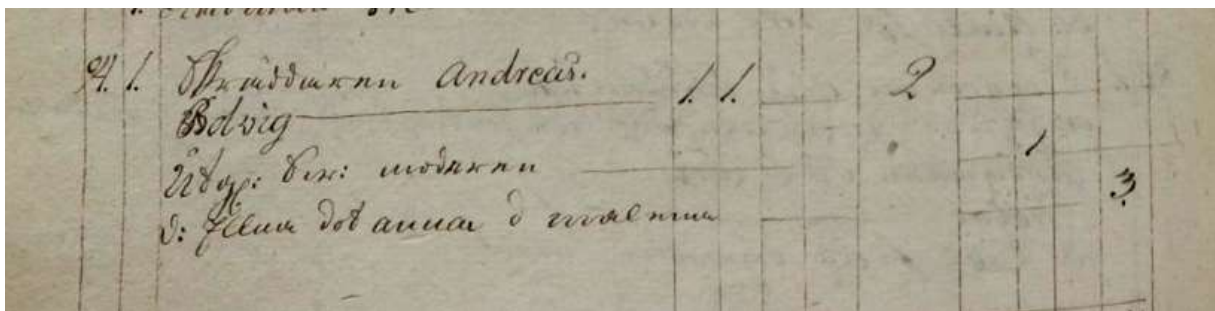

1791

Here Anders is no longer alive, the record says "Skräddaren Bolvis Enka" [The widow of taylor Bolvis]

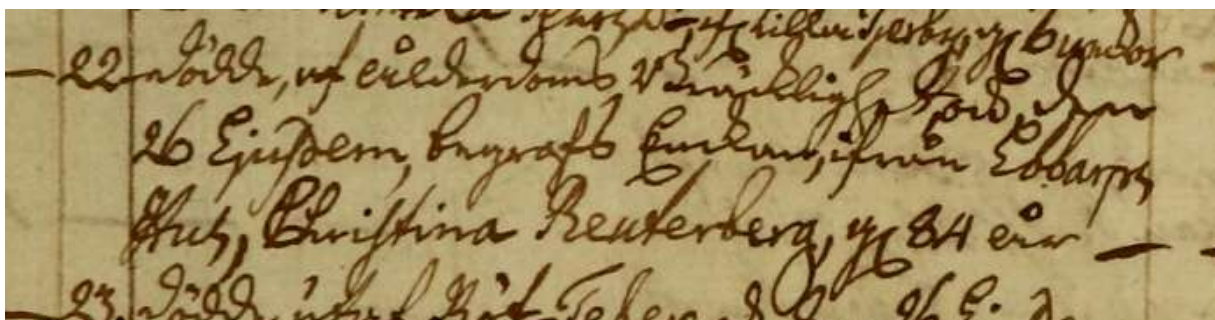

1784

Here Anders is not overaged. And the mother in law is referred to as "Sw. moderen", which should mean Anders' mother in law.

The death of Christina Reuterberg

"[Junii] 22 dödde, af ålderdoms Bräcklighet och den 26 ejusdem begrofs Enkan ifrån Ebbarbs hus, Christina Reuterberg, gl. 84 år"

This is the mother in law referred to in the taxation lists. The last name shows that it is the mother of Anna Margareta.

BUT! This raises another question – If Christina was 84 years old when she died in 1785, then she would have been born in 1701. That means that she hardly gave birth to Anna Margaretha in 1751.
